5)

The magazine that  
interests both  
teens and  
their parents.

# Future is hope !

**TOP 5** reasons why we live in a better time than our parents !  
Number 2 is going to surprise you !

So, we live in a happier time. We are luckier than our parents because we have access to different technologies like mobile phones, high-performance computers, etc... That is why we can cultivate ourselves in several ways like with Wikipedia for example !

Let's look at our Top 5 !

## 5. Online sport :

Indeed, thanks to online games, people who aren't sporty or are disabled can become sport champions thanks to international sport video games like the Fifa tournament (games of football). Nowadays anybody can become a world champion in football !

## 4. Social Networks (Twitter) :

Today, we inform ourselves about the latest news with Facebook, Twitter, etc ... ! We don't need TVs. It's old fashioned ... With our cell phones or computers it is faster to connect ourselves to the world. Thanks to social Networks we can speak with all our friends in the whole world ! We can also meet different people <3 ! Was it possible before ??? No ! And with Twitter Presidents entertain us ;-) !

#Trump

## 3. Netflix :

With Netflix's series, you learn how to react, especially in prison. You can discover other jobs like drug trafficker, serial killer or armed robber too. Thanks to Netflix's series you discover super powers.

## 2. Tinder :

With Tinder, you can meet the right people, to create a healthy relationship or so you believe. Or hook up<sup>1</sup> with many people !

## 1. Youporn :

Today, we can discover our body with YouPorn, even the youngest. And to boost the tissue's industry.

So, if you think again that we don't live in a good time, think about the traditional life ! With old clothes like the Amish style, old expressions, ect ... Even if Steampunks look smart and fun ... it's not for everybody to dress up in fancy clothes.

# A better time to live in !!!

**Clooser Teen**

Yesterday at 2:55am · 🌐

A better time to live in !!

Over the last years, the digital technology has conquered unexpected sectors : sport, to stop smoking, to find love ... Nevertheless, at the same moment isolated groups urged people to go away from technology for a better life and to go back to a traditional culture. Are we thus happier with new technologies?

Amish, Steampunks aren't telling you much? Nevertheless they are rapidly expending. They refuse technological progress on the pretext of being less happy with them,

Certain families decided to try this step backward, by cutting themselves from current technological novelties. The result was mitigated because on one hand their children had developed their imagination but nevertheless disappointed because they had the feeling to be isolated from the world... We, editorial board, we decided to let you speak your mind about your experience thanks to the creation of the hashtag #abettertimetolivein.

The results of your comments are agree with our idea on this matter. We are happy with the modern ways, because we do not know anything else and because if we were to have our phone, tablets... removed we would be incapable of feeling happy because we would feel excluded from the society.

We often hear that young people are addicted to their telephone, but is it true ?

They take advantage of the time they live in.

Would we be ready to give up all of our devices ?

Ladies are you ready to stay in the kitchen or be under the influence of your husband?

Sir are you ready to be a man of the past and to take distance with your children ?

So, it's not a necessary to return in past, we just need to be happy in our time, live in present with all our advantages. 🙄

# THE NIGHTMARE OF RETRO

Today, a lot of people think returning to a traditional way of life would make people happier, but for me, it would be a nightmare...

I have a nightmare, a world where video game parties happen only on Pacman and where Mario reigns as a master...

Could you really live in this world ?

I have a nightmare, a world without Top1 where fortnite doesn't exist...

Could you really live in this world ?

I have a nightmare, a world without technology where you must send letters to organize your parties and where music is on vinyl discs...

Could you really live in this world ?

I have a nightmare, a world where pranks or compilation of cat videos don't exist...

Could you really live in this world ?

I have a nightmare, a world where family board game afternoons are raging...

Could you really live in this world ?

I have a nightmare, a world where we must go to the library to read a book where we couldn't say "netflix and chill"...

Could you really live in this world ?

I have a nightmare, a world which doesn't have any challenges like " floor is lava" or the " ice bucket challenge", where we couldn't take pictures of what we eat...

Could you really live in this world ?

**I HAVE A NIGHTMARE**, a world where Despacito doesn't exist...

Hmm.. no... I didn't say that.

Hey teenagers! Your favorite mag is back !

## **The ridiculous does not kill !**

You have certainly met people with an eccentric look and wondered if behind their appearance there is some advantages to live like this, to live in the past ?

You probably know the Amish for their hasbeen style, that you would never, EVER adopt ! The way of life of this community which excludes modern devices and allows them to be more related. And do you know that they have a longer life expectancy than us ? So, if you want to be a centenarian, don't chat everyday !

Have you heard about steampunks ? Modern movement which takes it's inspiration from the past and new technologies. So they wear maybe strange clothes and elaborate costumes, but don't worry they are so friendly and polite. And mostly they absolutly want one thing : « BE NICE TO ONE ANOTHER », and now I'm sure that you love them.

Another example ? A Canadian family who lives like it's 1986. Surprisingly the McMillan family wanted to live without modern devices to experiment a new experience and get closer to his wife and his two sons. In our over-connected world, this uncommon family banished laptops, smartphones and TV. We can hear some of you shouting « they are mad! ». They just survive with an answering machine and according to them : people could live happier if they stopped to be over-informed.

People who live in the past sometimes live happier but if you prefer to live in our time, you can. The matter is to feel good about yourself.

Fashion is an eternal cycle if you wear your parent's clothes you could start a new trend !

Eliot / Baptiste / Chloé

## Return to the future (in the past)

Are you sick of constant messages ? Are you fed up of Donald Trump's tweets ? Do you want to give up everything ?

If yes , it's time to have a break.If not , if you are waiting for Donald Trump's next tweet while you send 15 messages to each of your contacts... Well then I will not bother you anymore and you can stop reading. For the others go forward .

If you're still here, let's begin.Some people went back to the 80's way of life .It allows them to get unplugged and to rebuild their family life.

If you want to do the same, you have to be aware that you will look like a redneck wearing the mullet and old-fashioned clothes, like him

If don't want to look like that ( like i'm guessing you do) you can join the steampunk movement which promotes respect between humans, politness and environment presrevation. They draw inspiration from the Victorian era (1837-1901) and science fiction , that explain their classy clothes.

Little bonus, if you join this movement you will becompe as stylish as he is

both of those way of thinking abd living are viable if you want a more traditionnal way of life. The most noticeable difference betwenn them is the way of dressing.

Make your choice.

(We will respect everyone's preference, even discutable one)

Mathias Masson and Axel Pontcharraud ( humorists at our free time)

## BACK TO THE PAST

Do you think that returning to a traditional life just like it was before, would make people happier ?

Are values and habits of the past still satisfying in today's life ?

We know a girl, who tried to commit suicide because she was harrassed for months and she received hundreds of calls and text messages a day to denigrate her.

Do you like technology but do you know its downsides ?

1) Do you prefer meeting people :

- ▲ via letters ?
- in real life ?
- ♥ on the net ?

2) After two weeks, without seeing your friends, are you happier to meet them, if :

- ▲ you did not talk to them at all
- you exchanged many messages
- ♥ you have been on the phone every night

3) when your friends return home after a party without giving you any news,

- ▲ you will see him tomorrow
- you send him a message
- ♥ you harass him with calls until he picks it up

4) In life you are rather the type :

- ▲ to work from an early age without qualifications
- to have just your « BAC »
- ♥ to study for many years

5) A stranger ask you a service :

- ▲ you accept to help him
- you don't want to, but you answer with kindness
- ♥ you slap the door on his face

6) If you see someone being assaulted, what are you doing ?

- ▲ you try and stop the aggression
- you're calling for help
- ♥ you leave without doing anything

7) Without phone would you worry more about the natural environment ?

- ▲ yes
- i don't know
- ♥ no

8) If you see a vast forest :

- ▲ you do not destroy it
- you don't care and you are going to pee in the forest
- ♥ you destroy it to build on it

▲ If you have a majority of triangles, your profile is ideal for a return to a traditional life. You could adopt yourself without difficulty to the 19th century way of life ! Well done you !

■ If you have a majority of squares, you live in the actual life but you could adapt yourself to traditional life. You would face some difficulties but you could overcome them. You could easily live in the 80's !

♥ If you have a majority of hearts, you are incompatible with a traditional life. You love futuristic ideas too much and the traditional life would depress you totally ! You might need a to go on technological detox !
